

WUTC.—The Inter-College Radio Network is the largest joint activity of Clarkson College and State University College. Close to 200 students from both schools combine their efforts to broadcast over 250 hours each week.

Back in the dark ages of 1947 sixteen students signed on WUTC and the station has been serving both colleges ever since. This year, new troop training programs were begun, and the east-west of radio in North Hall was completely renovated for the first time since 1964. But at WUTC it's the music that's most important, and there's plenty of it—24 hours every day. There is still the weekly "Beat's List" of top rock hits, but WUTC has also kept pace of the trend to albums and progressive rock. Along with great solid gold music, and new folk songs, the "Voice of the Northern Twin Colleges" is still Rochester's number one station.

At WUTC-FM it's been a year of expansion. Finishing touches were made to their new studio, and a dream has come true. Stereo R.I. is now a reality and so is higher power. Folk, R&B, bluesways, and progressive rock shows have been expanded—and so has the basic format of easy listening music—due to the new broadcasting hours of 3 P.M. to 3 A.M. Cover-

ations, concerts, educational features, new discussion programs—and of course Clarkson hockey—round out the programming. And most importantly, more people are listening to Stereo R.I.

The Network, formed in 1964, coordinates activities at both stations, handles financial matters, and provides news—both WUTC and WUTC to the community. This year an experiment has moved the Network into the television field as well. Both home and away, hockey games were video-taped for later playback in Levee House and the Hallmark.
